

# *Corona virus and vaccine development - get an update from Professor in Virology Allan Randrup Thomsen*

Monday 7 September - 13:00 - 13:45 CET - Conference Call

---

The corona virus has had profound impact on people's life, economies and financial markets. And will likely continue to do so for a considerable period. Investors are betting on an effective vaccine will help overcome the crisis soon. At the same time, there are a lot of myths and rumours about the virus and vaccines.

We are pleased to invite you to this conference call with Professor in Virology Allan Randrup Thomsen from Copenhagen University, who has deep insights into the virus and global vaccine developments.

Six months into the devastating corona epidemics, he will sum up what we know and don't know about the virus and how far we really are from finding an effective vaccine.

After Mr. Thomsen's presentation, there will be ample opportunity to ask questions about the virus and vaccine developments.

Jakob Ekholdt Christensen, head of international macro and emerging market research and Bjarne Breinholt Thomsen, Senior Equity Strategist, will also be on the call to answer questions on the global economy and equity markets.

Note: The call will be in English !
