3.4	08.12.2014	Description of the Danish CVR number for collection type Betalingsservice has been changed in field 12

The file is sent by the creditor to the bank.

Note: it is not possible to get a daily status file on debtor amendments (COLDEBMOD). If the creditor has asked for a status file (COLSTATUS), he will receive it *after* Collection Service has validated the file (COLDEBMOD). Therefore COLSTATUS only contains message types 01 or 02 (field 5).

The chart below describes how to construct comma-separated records for the debtor list.

- There must be one record per message.
- Every record ends with a semi-colon (;).
- Alphanumerical fields must begin and end with quotation marks (“”) even if there are no contents.
- Quotation marks must not be used in the individual fields.
- Fields are Required: Y (yes), N (no), C (conditional)
- If a field is required, it must be filled out.

Collection Service forwards the registration/deletion to the third party (BGC and Nets).

The file can be used for three different situations:

1. To create and delete mandates for:

- DK Direct Debit (LeverandørService and Betalingsservice)
- SE Direct Debit (Autogiro)
- NO Direct Debit (Autogiro)

2. To delete mandates for:

-

3. To amend the customer number of mandates for:

- DK Direct Debit (Betalingservice or LeverandørService).

Number of positions (No. of pos.):

The individual fields have no fixed length. Therefore it is not necessary to put a blank space or 0 before or after the contents of a field. The *maximum* length is stated in the description of each field.
