

Transaction Volume Report sent to customer in comma separated file format (TRANVOL).

This format describes the layout of corporate report files containing Transaction Volume Report data.

Every file starts with a line (record) containing header columns (one header for every data column, in customer language) followed by a number of lines (records) containing the data columns.

(AN in "Format" column means alphanumeric)

Field no.	Field code	Max. no. of chars.	Format	Description
1	Group name	40	AN	Internal group name
