Introduction

This document covers Danske Bank's interpretation of the "CustomerDirectDebitInitiationV02" as described by the ISO 20022 – pain.008.001.02 standard. The format is used for sending Core and B2B SEPA Direct Debit transactions to Collection Service.

Files received by Danske Bank must adhere to this standard and must be valid according to the XML Schema for pain.008.001.02 as published on <http://www.iso20022.org>.

Furthermore the files must comply with the following guidelines published by the European Payment Council (EPC):

- SEPA Core Direct Debit Scheme Customer-to-Bank Implementation Guidelines 2017 v1.0 (EPC130-08)
- SEPA Business to Business Direct Debit Scheme Customer-to-Bank Implementation Guidelines 2017 v1.0 (EPC131-08)

They can be found at: <http://www.europeanpaymentscouncil.eu/>

Parts of this document is based on the information found in the above mentioned documents. Additional information about how Danske Bank interprets the format has been added. The document also contains an overview of the file layout and example files.

In order to fully understand the format it is recommended to read the ISO 20022 format description and the EPC guidelines.

The document contains five different sections:

- File Layout: The overall file layout of the xml-file containing the SEPA Direct Debit transactions.
- Example File: An example of a SEPA Direct Debit file with a single transaction.
- Description: Information about how the format description is structured.
- Group Header: Description of the header part of the xml file.
- Payment Information: Description of the main part of the xml file.

Change log

Date and version	Comment
10.11.2010 - 1.00	First version of the format description.
23.12.2010 - 1.01	Minor corrections to information about ACK handling.
01.10.2013 - 1.01	BIC has changed status from mandatory to optional.
06.11.2016 - 1.02	Updated to adhere to current EPC130-08 and EPC131-08 document versions (v9.0 and v7.0 respectively)
22.09.2017 - 1.03	Updated to adhere EPC130-08 and EPC131-08 documents 2017 Versions 1.0., which will take effect on 19th of November, 2017.
06.11.2018 - 1.04	As a result of Germany joining the Group SEPA Direct Debit solution, Germany specific NOTE is added to the description of End To End Identification (Index 2.74).
05.09.2019 - 1.05	Updated information on BIC usage when one of the banks is not in EEA area
12.07.2021 - 1.06	End To End Identification (Index 2.74) updated: duplicate values also accepted. Danske Bank Germany specific rules removed.
15.11.2021 - 1.06	Example of debtor's address added to the example file. Debtor's address is mandatory when the Creditor Bank or the Debtor Bank is located in a non-EEA SEPA country or territory.
22.03.2022 - 1.07	Updated Danske Bank column for 2.136 DebtorAgent and 2.137 FinancialInstitutionIdentification
27.03.2024 - 1.07	Updated Danske Bank column for Message Identification

File layout

The XML file should start with the following:

```
<?xml version="1.0" encoding="UTF-8"?>
<Document xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xmlns="urn:iso:std:iso:20022:tech:xsd:pain.008.001.02">
  <CstmrDrctDbtInitn>
```

After this there is one instance of a "Group header" and then there can be multiple instances of "Payment Information". Each "Payment Information" can contain multiple instances of "Direct Debit Transaction Information". A "Direct Debit Transaction Information" contains the detail of a single Direct Debit transaction:

```
    <GrpHdr>
      ...
    </GrpHdr>
    <PmtInf>
      ...
      <DrctDbtTxInf>
        ...
      </DrctDbtTxInf>
      ...
      <DrctDbtTxInf>
        ...
      </DrctDbtTxInf>
    </PmtInf>
    ...
    <PmtInf>
      ...
    </PmtInf>
```

The file should end by closing the two start tags:

```
  </CstmrDrctDbtInitn>
</Document>
```

Description

The format is described in a table structure. The below table indicates what the different columns in the table contain.

Column Header	Content
Index	The index used in the official ISO description and the EPC descriptions
Mult	<p>Indicates the cardinality of the element according to the ISO 20022 XML standard. The first digit indicates the minimum number of repetitions and the second digit indicates the maximum of repetitions ('n' is used to indicate that there is no limit). E.g.: [1..1] means that the element should be there at least 1 time and maximum 1 time. This is the same as saying that the field is mandatory and there is only one occurrence.</p> <p>The field is also used to indicate conditional relationships between elements, where one of two elements should be present, but not both. This is indicated by preceding row where "SEPA B2B and Core Requirements" column value is "Choice"</p>
Message Element	The ISO-name of the elements. The number of plus (+) signs preceding the element name indicates the nesting level of the tag in the xml file.
SEPA B2B and Core Requirements	The requirements stated by EPC in the Core and B2B guidelines.
<XML Tag>	The actual XML-tag for the element.
Danske Bank M/C/O/N	<p>Indicates how Danske Bank uses an element:</p> <ul style="list-style-type: none"> M = Mandatory (must be filled in) C = Conditionally (must in some cases be filled in depending on other information in the file) O = Optional (can be used) N = Not used <p>Even though a field might not be used by Danske Bank, it might be mandatory in order to have a valid file.</p>
Danske Bank Comments	Comments regarding an element that might be useful when creating a file.

Character sets

There are some limitations on the fields used for identification. They are limited to either the "Latin character set" or the "Restricted latin character set" (see below). It is noted in the column with "Danske Bank comments" if the field is limited. Otherwise the characters defined by the UTF-8 standard can be used. It should be noted that the bank that receives the transaction is only obliged to support the "Latin character set", so some UTF-8 characters might be replaced with characters from the "Latin character set".

Latin character set

a b c d e f g h i j k l m n o p q r s t u v w x y z A B C D E F G H I J K L M N O P Q R S T U V W X Y Z
0 1 2 3 4 5 6 7 8 9 / - ? : () . , ' + Space

Restricted latin character set

Except for space, the "Restricted latin character set" is similar to the "Latin character set":
a b c d e f g h i j k l m n o p q r s t u v w x y z A B C D E F G H I J K L M N O P Q R S T U V W X Y Z
0 1 2 3 4 5 6 7 8 9 / - ? : () . , ' +

Example file - single transaction

Here is an example file of how a single SEPA Direct Debit transaction could be made.

- It is the first (line 25) SEPA Core (line 23) Direct Debit transaction (line 17 and 20) towards a debtor.
- It is marked as a test file (line 8), so the transaction will never be executed.
- The due date is set to be the 1st of December 2020 (line 27).
- The transaction is on 100.00 euro (line 57).
- It will be transferred from the debtor Alice (line 70) account DK3030000987654321 (line 74) in Danske Bank (line 66) to the creditor
- Bob A/S (line 29) account DK1030001234567890 (line 33) in Danske Bank (line 38).
- The debtor's mandate id is 5555 (line 60) and the mandate has been signed on the 1st of October 2020 (line 61).
- The creditor's SEPA Direct Debit identifier is DK67ZZZ300077777777 (line 45). This is used to identify the creditor.
- The end-to-end id for this transaction is 20101101-5555-0001 (line 55). This key is used to uniquely identify the transaction.
- It will be present in the status files for this transaction.
- It has been indicated that all status changes should result in a status file (line 77).
- The direct debit is regarding a "Magazine subscription" (line 79).

Example file - with debtor amendment

Here is an example of a SEPA Direct Debit transaction with a debtor amendment. This example is similar to the previous example except for the lines 62 to 69 that contains the amendment information. Line 82 is changed to contain the new account number (new and original accounts are held with the same bank).

- It is indicated that the mandate has been changed (line 62).
- Debtor's original account number is DK3030000987654321 (line 66).
- Debtor's new account number is DK1530009876543210 (line 82).
